## Introduction

Your creativity and capability to read a brief will be tested in this module.

In this task you are given a complex design that needs to be implemented as close it is possible with the provided design.

You can use HTML, CSS and JS with any combinations of the frameworks (Bootstrap, Tailwind, React, Vue etc. – not included) and CDN is not allowed.

You will have 3 hours for this task.

---

## Task Requirements

Design and implement 1 page design (desktop (1200px) and mobile views). you need to create a single HTML page with associated CSS and JS. For the dropdown menu no sample is provided and is your task to develop a drop-down placeholder menu. The method (CSS or JS) and animation is your choice entirely. You should have other animations through the page (e.g., zooms, easy in-out, flip etc).

You can use Bootstrap/Tailwinds or custom CSS for CSS. React, Vue, Vite or Svelte are permitted.

Two variants of the Safety Science Academy (SSA) logo and UoP have been provided. These cannot be altered in any way, and any must have a minimum of a 25px respect distance from any object when used. Ensure that no more than four colours are used, with the exception of monochromatic colours/shades.

UoP brand uses the included font, “Open Sans” which must be used on the site. You may select additional fonts to use, however no more than three fonts may be used across your design. Samples of the main texts are provided in media folder. A larger version of landing page is available in media folder. The design must be implemented as close as possible with the provided sample.
